

# ASSET VUE

Strategic Data Center Vision

## The cost of missing equipment and data...

- A data tape can easily contain 5 million customer records per tape
- A recent survey of 301 IT decision maker's states that 42% state it could take a day or longer to find a server that had gone down
- The cost to a corporation for just the remediation effort on a lost customer record falls between \$72 and \$193 per record...

Asset Vue Tracker 2.3 is the perfect solution for keeping your assets right where they belong, and keeping track of all the Moves & Adds and is a terrific complement to a DCAM tool like Asset VUE Inventory or DCIM applications.

- Completely **web-based interface** for fast deployment and easy management
- Ability to send alerts to **SNMP manager** and create SNMP triggers  
Trigger/silence any **external device** (such as a stack light, siren or camera)
- **E-mail alerts** to any user or distribution list
- **Real-time asset tracking** in and out of your space
- Works with nearly **Any IT Asset:** server, switch, backup tape, laptop, etc.
